Introduction

Economics of Sex, Drugs and Rock 'n' Roll aims to show students how economics can be used to help understand almost every aspect of human behavior, ranging from drug addiction and prostitution to religion and suicide. The conventional wisdom is that these behaviors should be studied only by sociologists and psychologists. With special attention to the evolution of economic ideas, as well as state-of-the-art economic theory and empirical analysis, the fallacy of this proposition will be demonstrated. Further, this course will provide you with sufficient knowledge to decipher between the economic facts and economic myths that pervade popular news media, particularly on topics such as the legalization of drugs and prostitution, and the pros and cons of capital punishment.

Required Readings

The book that contains most of the required reading:

• Simon W. Bowmaker (ed.), *Economics Uncut: A Complete Guide to Life, Death and Misadventure*, Edward Elgar Publishing.

I strongly suggest that you read the assigned reading before the class discussion of the topic. In the class, I will usually cover the concepts and issues that are *most challenging*, *reinforcing* and *extending* what is in the required reading. I suggest that after each class you review the assigned reading to solidify your understanding.

Course Requirements and Assessment

Midterm (Wednesday, October 25)	30%
Presentations (Mon, Dec 11, Tues, Dec 12, Wed, Dec 13)	15%
Final (Monday, December 18)	40%
Class participation	15%

Website

I will maintain a website for the course using NYU classes. The website will include announcements and downloadable files with the class lectures.

Classroom norms

Laptops, cell phones, and other electronic devices are a disturbance to both students and professors. All electronic devices must be turned off prior to the start of each class meeting.
